ANNOUNCEMENT

New Features to Authenticate Motor Vehicle Ownership Transfer Transactions

The Rwanda Revenue Authority (RRA) informs **all motor vehicle sellers, buyers, and private notaries that new features have been deployed in the tax system (e-Tax) - Motor Vehicle Module** to enhance transparency and compliance during motor vehicle ownership transfers.

Sellers are now required to **generate a Tracking Code** that has to be shared with the buyer and the private notary, who will notarize the sale agreement, **for verification that the motor vehicle has no tax arrears, caveats or other issues** that may hinder the ownership transfer process.

Private notaries are also required to **use and notarize the sale agreement using a standard template** available for download from the system, while ensuring the accuracy and authenticity of the transaction.

For more information, please visit RRA social media channels or call 3004.
