

RWANDA REVENUE AUTHORITY
TAXES FOR GROWTH AND DEVELOPMENT

TAX COMPLIANCE IMPROVEMENT PLAN (2023-2024)

JUNE 2023

**RRA VISION
STATEMENT**

"To become a world-class efficient and modern revenue agency, fully financing national needs."

**RRA MISSION
STATEMENT**

"Mobilise revenue for national development through efficient and equitable services that promote business growth."

**RRACORE
VALUES**

- We are Customer-focused;
- We act with Integrity;
- We are Accountable;
- We work as a Team;
- We are Professional.

FOREWORD

We are pleased to introduce the RRA tax Compliance Improvement Plan for the year 2023/2024. This Compliance Improvement Plan is fundamental as it outlines, at the highest level in line with our strategic direction, the compliance approaches we will be using during this fiscal year in our efforts to improve compliance with tax legislation.

This Tax Compliance Improvement Plan demonstrates how RRA, as a Tax and Customs Administrator adopts the same to improve voluntary tax compliance. It outlines specific strategies by focusing particular attention on areas which our researches and risk analysis model and tools have shown pose a significantly higher risk of non-compliance.

Our tax system is based on the principles of self-assessment and voluntary compliance which relies on taxpayers' honesty in determining their tax obligations, submitting their tax returns, payment of due taxes and accurate reporting. We believe that if you are making your fair contribution and doing the right thing, you deserve to know that everyone else is doing so too! As we make it easier for all taxpayers to meet their obligations quickly, easily, and cost-efficiently, we must make equally sure that those who don't pay their fair share and don't abide by the rules are brought into the fold. By focusing on these issues, we believe we can make a significant impact on increasing the fairness of the tax system.

We have been striving to modernize our systems to facilitate the collection of taxes and enhance compliance with tax laws. The modernization of our systems has led to improvements in the quality and integrity of data. This has enabled us to sharpen our research and analytical capabilities, providing us with key insights which have enhanced our understanding of taxpayers. From this data, we have been able to prioritize areas that require our immediate attention, the results of which have informed our compliance program.

This Compliance Improvement Plan will focus on two main aspects which are; general compliance interventions and specific compliance interventions. Our general compliance interventions will focus on the four core areas of tax compliance obligations that is registration, filling, payment and accurate reporting. Our specific compliance interventions will be composed of two parts which are domestic taxes and customs services. Our compliance interventions on domestic taxes will focus on wholesale and retail trade and manufacturing sectors.

Our compliance interventions on customs services will focus on Importers dealing with high-risk commodities, Importers who imported goods from the high-risk origin, Traders who benefited EAC duty remission scheme (exemption), selectivity criteria with the highest hit rate and Customs brokers (Clearing Agencies).

The areas earmarked for attention in this publication are of course not the only areas we will be working on. We will continue with our usual work in detecting and deterring non-compliance through the use of our risk engines, third party data and other sources of information which help us to identify non-compliance. In externally publishing our compliance improvement plan we seek to inform taxpayers, tax practitioners and stakeholders of existing taxation compliance challenges and RRA's refreshed approach at addressing these challenges. As RRA works towards realizing its vision, let us continue to work together to improve tax compliance in the interests of the nation's growth and development.

Sincerely,

BIZIMANA RUGANINTWALI Pascal

Commissioner General

1

INTRODUCTION

The Primary goal of a revenue authority is to collect taxes payable in accordance with the law and to do this in such a manner that will sustain confidence in the tax system and its administration. The actions of taxpayers – whether due to ignorance, carelessness, recklessness, or deliberate evasion, as well as weaknesses in the tax administration mean that instances of failure to comply with the tax law are inevitable. Therefore, tax administration should have in place strategies and structures to ensure that non-compliance with tax laws are kept to a minimum. The art of good tax administration is based on the creation of an environment which is strongly facilitating compliance. This Compliance Improvement Plan outlines how RRA is going to achieve this.

A tax compliance improvement plan is a high level plan which brings together in a single document a description of the most significant compliance risks identified in the tax system and sets out the broad detail of how the revenue agency intends to respond to those risks. The development of a tax compliance improvement plan allows a revenue agency to systematize its compliance risk identification, risk prioritization, and compliance strategy planning and delivery in a way that ensures a focus on the most significant issues and makes best use of available resources across functional areas. It also provides a transparent and defensible record of the process by which the revenue agency's compliance plans have been formulated (i.e., why resources have been devoted to particular risks in preference to others).

This compliance improvement plan will answer the following questions;

- What are the major compliance risks to be addressed?
- Which taxpayers do they relate to?
- How should these risks be treated to achieve the best possible outcome?

Strategies in this compliance improvement plan intend to enable RRA achieve its objective of taxpayers committing to their tax obligations and enhancing voluntary compliance. During the period of this compliance improvement plan, RRA efforts will focus on improving Taxpayers' compliance in areas identified as most risky. This is going to be achieved through undertaking various initiatives intending to influence Taxpayers' compliance behaviour.

2

BACKGROUND

In the past, revenue bodies used the command-and-control approach. Since the end of the last century, revenue bodies have shifted the focus to risk management and take action only if there is a real risk to address. A modern compliance strategy focuses on giving each taxpayers' category the appropriate attention. Compliant behaviour requires a different response to non-compliant behaviour. Compliant behaviour requires support, while non-compliant behaviour may require severe action, depending on the cause.

Since the establishment of Rwanda Revenue Authority, numerous activities have been implemented to enhance Taxpayers' compliance in registration, filling of tax returns, payment of taxes and accurate reporting.

The TADAT assessment report of August 2015 identified unsystematic assessment of compliance management interventions across the RRA in the areas of registration, filing, payment and accurate reporting and highlighted that there is a need for RRA to understand the causes of non-compliant behaviour of taxpayers and take adequate corrective measures. It is in this context that RRA with IMF technical assistance developed compliance risk analysis model and tool based on best practices from Australia Tax Office. Since then, RRA adopted developing and implementing the annual tax compliance improvement plan. RRA has so far developed and implemented seven (7) annual tax compliance improvement plans. The plans have been developed and implemented focusing particular attention on areas and sectors which research and risk analysis model and tools show pose a significantly higher risk of non-compliance.

The TADAT assessment of 2019 pointed out some weak areas including not addressing all compliance risks that RRA has rated as high in the strategic planning process. It is in this context that the tax Compliance Improvement Plan 2019-2020 onwards focuses on two main aspects that is; general and specific compliance interventions.

3

OBJECTIVES OF THE COMPLIANCE IMPROVEMENT PLAN

The purpose of a taxpayer compliance program is to identify and respond to the most significant risks in the tax system through a wide range of measures aimed at the underlying causes of the noncompliance behaviour. The main objective is to achieve the wider possible impact on voluntary compliance across the taxpayer population. Specifically, the RRA tax compliance improvement plan 2023-2024 intends to;

- Elevate voluntary tax compliance;
- Improve Taxpayers' knowledge;
- Improve Taxpayers' attitudes and perceptions towards paying taxes;
- Improve the community confidence with the tax administration.

4

UNDERSTANDING COMPLIANCE

Generally, compliance means conforming to a specification, standard or law that has been clearly defined. It is the practice of obeying a rule and law in accordance with established guidelines, try to fit specific standards set and meet the requirements of prescribed regulations. Compliance in the context of tax administration refers to the extent to which taxpayers and traders, along with intermediaries like practitioners fulfil their tax obligations. Compliance with tax laws in Rwanda typically means registering when required, filing returns on time, reporting complete and accurate information to determine tax liability and paying all amounts owing when due. Non-compliance occurs when any of these obligations are not met for whatever reason.

Different studies categorize Taxpayer's compliance in two perspective models (economic Deterrence model and fiscal and social psychology model). Economic Deterrence model is based on the concept that the risk of detection and punishment will improve compliance behaviour. Whereas fiscal and social psychology models inductively examine the attitudes and beliefs of taxpayers in order to predict actual behaviour.

The tax legislation is comprehensive and complex but from an overall point of view the obligations of the taxpayers are categorized into the following four compliance requirements:

- **Registration** - Any person subject to any type of tax administered by RRA has to be registered in RRA and obtain a fiscal number before engaging in any economic activity of taxation relevance.
- **Filing and declaration** – Taxpayers have to file tax returns with RRA in accordance with the tax legislation. All importers and exporters have to declare their imports or exports in accordance with the East African Community Customs Management Act (EACCMA).
- **Complete and accurate reporting** – Each taxpayer is obliged to keep evidence of economic activities (books, records, invoices, etc.) as required in the tax legislation and submit/present the data and or documentation required by RRA accurately and timely in accordance with the tax legislation.
- **Payments** – Taxpayers have to pay taxes and duties at the specified time without RRA notice or request.

If a taxpayer fails to meet any of the above obligations, then they may be considered to be non-compliant. The willingness and behaviour of a Taxpayer to meet tax obligations has a major impact on compliance levels. In order to achieve the optimal level of compliance, it is necessary to pay attention to Taxpayer's behaviour and the methods of influencing behaviour. This assists the tax administration in choosing the most efficient (low costs) and effective (best outcome) way to treat such behaviours. This is better explained in the OECD Compliance pyramid and behaviour model shown below:

Figure 1: Compliance model

Source: OECD 2004, Compliance Risk Management Guidance Note

The compliance model above provides a structured way to better understand what motivates people to comply, or not comply, and it assists us to tailor our responses and interventions so that we can influence taxpayer behaviour in a positive way. It recognizes that taxpayers are not a homogenous group and their circumstances can change over time.

The left side of the model identifies the wide variety of factors that can influence the extent to which a taxpayer chooses or is able to meet their obligations, including business, industry, sociological, economic and psychological factors. This mix of environmental factors is represented by the acronym BISEP. B = business profile, I = industry factors, S = sociological factors, E = economic factors and P = psychological factors.

The right side of the model reflects the different taxpayer attitudes to compliance, ranging from 'willing to do the right thing' to 'have decided not to comply', and the corresponding high-level strategies that are most likely to effectively address those attitudes.

5

OUR APPROACH TO DETECT NON-COMPLIANCE

While the overall compliance climate is showing improvement, we know that we need to continuously focus our efforts on not just sustaining the levels of willing compliance, but on creating a climate that is increasingly conducive to full compliance by all taxpayers. To do this we need to constantly monitor the compliance levels of taxpayers, traders and other stakeholders in order to pin-point areas of high or low compliance and then to understand the drivers of this good or bad behavior so that we can devise appropriate strategies in line with our compliance approach to sustain or alter the behavior as required. To ensure our Compliance Improvement Plan is broad and inclusive, and that we explicitly focus on changing the compliance landscape, the following approaches were used to detect noncompliance:

Analysis:

- Analysis of Taxpayers registered in some tax heads but not registered in others which they are eligible
- Analysis of non-filers and late filers
- Analysis of non-payers and late payers
- Analysis of Taxpayers' declarations and tax audit findings for targeted sectors

Study:

- Economic sector performance and tax compliance (2022)

Risk Differentiation Framework (RDF):

RRA adopted the Risk Differentiation Framework (RDF) tool made up of four different quadrants (groups) that contain taxpayers with common behaviours as per risk perspective. RDF tool helps to frame taxpayers' risk levels using different metrics.

Quadrant 1: Higher Risk Taxpayers

Quadrant 2: Key Taxpayers

Quadrant 3: Medium Risk Taxpayers

Quadrant 4: Lower Risk Taxpayers

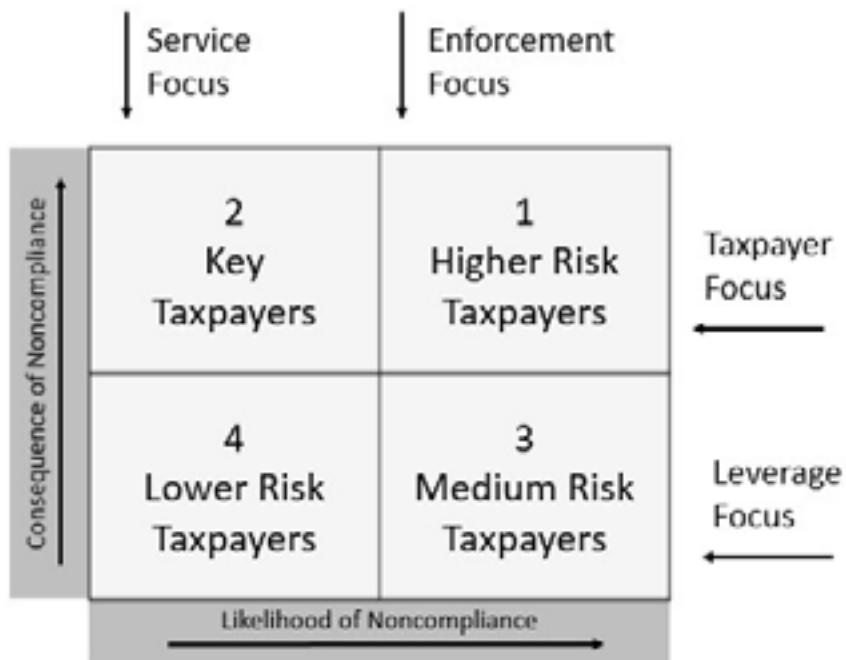

Figure 2: RRA Risk Differentiation Framework

The above RDF is based on the premise that our risk management approach to tax compliance should take account of our perception of both the:

- i) Estimated likelihood of having a tax position that we disagree with, or taxpayer (through error or omission) have misreported tax obligations (as evidenced by behaviour, approach to business activities, governance, and compliance with tax laws),
- ii) Consequences of that potential non-compliance (financial impact, relative influence, impact on community confidence).

6

PRIORITY AREAS AT A GLANCE

The Compliance Improvement Plan 2023-2024 will focus into the following areas.

i) General compliance intervention:

- Registration
- Filing
- Payment
- Complete and accurate reporting

ii) Specific compliance intervention:

Domestic Taxes

- Wholesale & retail trade sector
- Manufacturing sector

Customs Taxes

- Importers dealt with high-risk commodities
- Importers who imported goods from high-risk origin
- Traders who benefited EAC duty remission scheme (exemption)
- Selectivity criteria with highest hit rate
- Customs brokers (Clearing agencies)
-

7

GENERAL COMPLIANCE INTERVENTIONS

The TADAT assessment of April 2019 recommended RRA to always include all compliance activities in the annual compliance improvement plan. It is in this regard that this Compliance Improvement Plan 2023-2024 is including the general compliance interventions which focuses on the four core areas of tax compliance obligations, namely registration, filling, payment and accurate reporting, all taxpayer segments and all tax heads. Data were analysed to identify the instances of non-compliance in all core areas of tax compliance, all taxpayer segments and all core tax heads that is VAT, CIT/PIT, PAYE and Excise duty.

Compliance Strategy: General Compliance Intervention

Key Compliance Risks	Risk Treatments
<u>1. Registration risk:</u> High <ul style="list-style-type: none"> • Significant number of operating businesses not registered as Taxpayers; • Taxpayers declaring CIT/PIT turnover eligible for VAT but not registered; • Taxpayers registering in VAT but not in CIT/PIT; • Importers importing goods with CIF eligible for CIT/PIT registration but not registered; • Importers importing Vatable goods with CIF eligible for VAT registration but not registered; • Taxpayers with purchases eligible for CIT/PIT and/or VAT but not registered; • Potential buyers eligible for CIT/PIT and/or VAT but do not disclose their TIN at supplier's Point of sale (POS); • Taxpayers with trading license but not registered in income tax. 	<u>1. Education</u> <ul style="list-style-type: none"> • Education seminars to new registered taxpayers; • Communication campaigns on different tax issues; • Produce and disseminate practice notes; • Prepare and publish rulings on RRA website. <u>2. Support</u> <ul style="list-style-type: none"> • Extend Customer relationship management system to One Stop Service Centre (OSSC) and EBM functions; • Sensitise and facilitate taxpayers on adoption of electronic invoicing system.

<u>2. Filing risk:</u>	High	<u>3. Detection</u>
	<ul style="list-style-type: none"> • Many small Taxpayers lack understanding of tax obligations; • Late filing and missing returns. 	<ul style="list-style-type: none"> • Assess & identify potential taxpayers to be registered; • Identify risk cases on public tenders; • Risk analysis for high risky products and services for CSD & DTD;
<u>3. Payment risk:</u>	High	<ul style="list-style-type: none"> • Comparative analysis between VAT input claimed by buyers and VAT output declared by suppliers; • Identify most risky taxpayers not filing and paying on time for engagement; • Tax audits to risky taxpayers; • Develop a web-based dashboard for monitoring tax gap; • Develop a web-based dash board for indicators that show the evolution of taxes, registration status and EBM adoption.
<u>4. Inaccurate and incomplete reporting risk:</u>	High	<ul style="list-style-type: none"> • Under declaration of income; • Inflated expenses and continual losses; • Taxpayers implementing aggressive tax planning; • Purchases and expenses being redirected for personal use; • The cash-based economy enables informal transactions (off books).

8

SPECIFIC COMPLIANCE INTERVENTIONS

The specific compliance interventions will focus on both domestic taxes and customs taxes. On domestic taxes, the plan will focus on Wholesale & retail trade and manufacturing sectors. On customs taxes the plan will focus on Importers dealt with high-risk commodities, Importers who imported goods from high-risk origin, Traders who benefited EAC duty remission scheme (exemption), Selectivity criteria with highest hit rate and Customs brokers (Clearing Agencies).

8.1 DOMESTIC TAXES

The compliance actions for risky sectors in domestic taxes will be categorized into literature, community interaction, media, education seminars and advisory visits. To be able to map taxpayers into risk quadrants risk metrics in the following table were used.

The process starts by providing a weight to each metric where the total weight should be equal to 100 points for each dimension. Metrics are ranked in terms of Likelihood and Impact. Percentiles are computed on each taxpayer and each metric followed by calculating the point. Points (score) are then distributed to different quadrants.

DTD Risk metrics

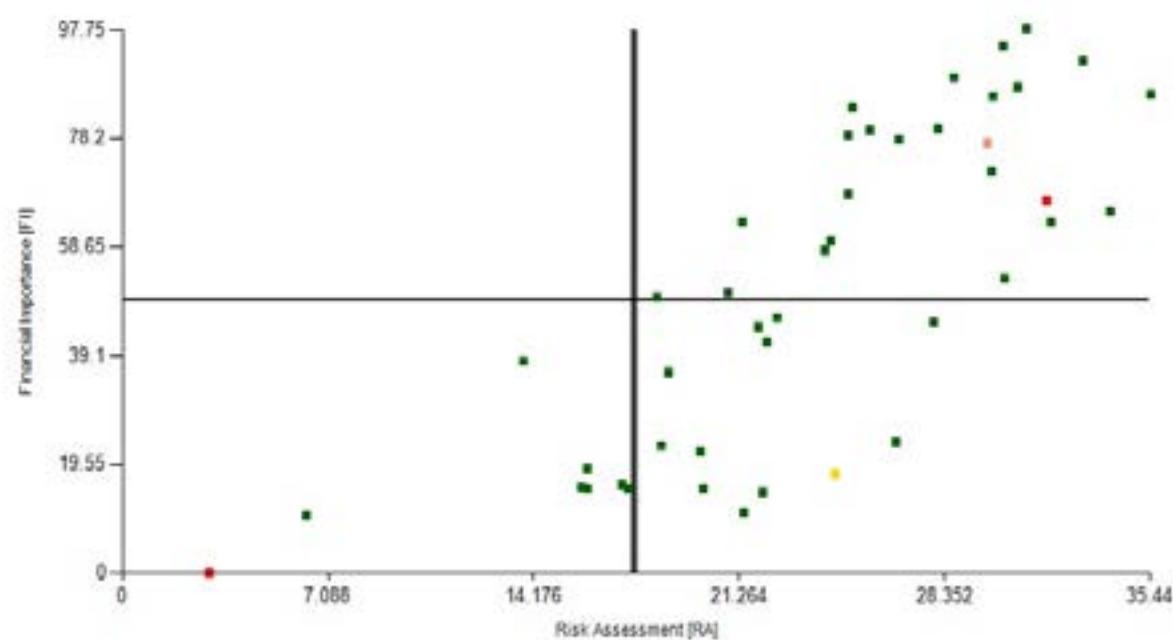

FINANCIAL IMPORTANCE METRICS	RISK ASSESSMENT METRICS
Income – 30%	Effective Tax Rate – 7%
Total Supplies – 35%	Ratio: Purchases to Supplies – 5%
Arrears – 10%	Ratio Payments Liabilities (All) – 5%
Payments (All Accounts) – 15%	Ratio VAT Input Output – 8%
Losses for Year – 5%	Ratio Payments Liabilities VAT – 5%
Imports Value (CIF) – 5%	Ratio refund Not Yet Approved – 5%
	Ratio: Change of expense YOY – 3%
	Ratio Payments Liabilities CIT – 5%
	Net Profit Margin – 7%
	Net Profit Margin YoY – 7%
	Ratio: Current Losses to Carried – 7%
	Ratio: Net Income over Gross Income – 5%
	Sales Variance VAT and CIT – 5%
	% of Late Returns – 3%
	% of Missing Returns – 3%
	% of Late Payment – 3%
	% of Revised Assessments by RRA – 5%

	% of Revised Assessments by Taxpayer – 3%
	% on Audit Result – 7%
	% offenses – 2%

8.1.1 Wholesale & Retail Trade Sector

The Wholesale and retail trade sector represents a significant share of the tax base. The sector contributes 1.8% of total CIT/PIT, 6.4% of total VAT and 3.7% of total PAYE (Calendar year 2022). The sector contributed 10% to the total GDP in the year 2022.

Figure 3: RDF results for wholesale & retail trade sector (Large Enterprises)

Profiles are highlighted in the colour of the category associated with their most prominent risk metric.

For example, if the most prominent risk metric in a profile is in the VAT category, the profile will be highlighted in the VAT category colour.

The purpose of this approach is to, at a glance, visualize the key issues associated with the selected taxpayers.

Compliance Strategy: Wholesale and Retail Trade Sector

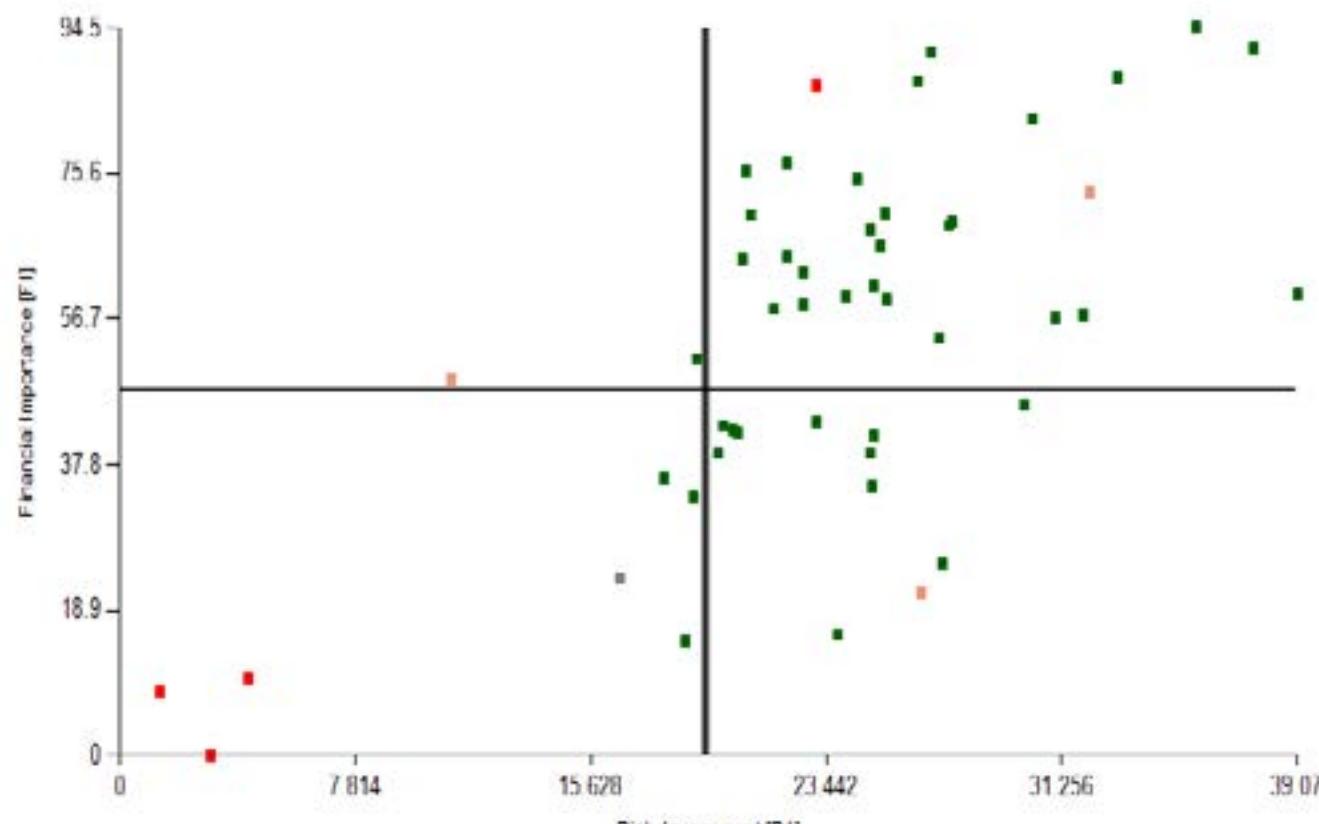

Key Compliance Risks	Risk Treatments
1. Registration risk: High	1. Education
<ul style="list-style-type: none"> Taxpayers registered in some tax heads but not registered in other taxes to which they are eligible. 	<ul style="list-style-type: none"> Develop literature and distribute education materials explaining tax requirements;
2. Filing risk: High	1. Education
<ul style="list-style-type: none"> Missing tax returns; Late filling of tax returns. 	<ul style="list-style-type: none"> Conduct education seminars for wholesale and retail trade enterprises and individuals on tax requirements; Conduct advisory visits;
3. Payment risk: High	1. Education
The majority of arrears are associated with high risk small & micro enterprises.	
4. Inaccurate and incomplete reporting risk: High	1. Education
<ul style="list-style-type: none"> Difference between exports declared and Customs data; Non declaration of gains from disposal (sale) of assets; Non apportionment of input VAT (in case of taxable and exempted sales); Expenses without supporting documents; Expensing VAT input; Not withholding 15% on payments made to unregistered suppliers; Damaged goods without supporting documents; Overstatement of cost of goods sold; Declaration of non-deductible expenses; <ul style="list-style-type: none"> <i>Expensing Personal insurance;</i> <i>Expensing penalties;</i> <i>Expenses for personal use;</i> <i>Expenses not related to the business;</i> <i>Expensing interests on delayed payments to suppliers;</i> <i>Security deposits for rent expensed.</i> 	<ul style="list-style-type: none"> Coordinate with the Rwanda Private Sector Federation (PSF) to: <ul style="list-style-type: none"> <i>Better understand noncompliance;</i> <i>Communicate with enterprises and individuals in the sector.</i> 2. Detection <ul style="list-style-type: none"> Carryout tax audits to risky taxpayers; Data analysis to identify non-compliance (underreporting) cases. 3. Enforcement <ul style="list-style-type: none"> Taxpayers' recruitment on central taxes; Identify, monitor and follow up non-filers and non-payers; Automated SMS to remind of filing and payment obligations; Enforcement of tax arrears.

- Differences between staff costs declared in profit and loss account as per RRA returns and staff costs in trial balance;
- Overstatement of customs duties and infrastructure development levy (IDL) declared;
- Overstatement of depreciation;
- Benefit in kind not charged PAYE;
- Fines for late delivery included in cost of goods;
- Not charging VAT reverse charge on services available locally;
- Input VAT claimed not related to the business;
- Overstatement of taxes paid in Customs;
- Understating cost of closing stock;
- Taxable sales declared as exempted;
- Wrong amount of losses carried forward.

8.1.2 Manufacturing Sector

The manufacturing sector represents a significant share of the tax base. The sector contributes 0.7% of total CIT/PIT, 8.4% of total VAT and 3.5% of total PAYE (Calendar year 2022). The sector contributed 10% to the total GDP in the year 2022.

Compliance Strategy: Manufacturing Sector

Key Compliance Risks	Risk Treatments
1. Registration risk: Medium	
<ul style="list-style-type: none"> Taxpayers registered in some tax heads but not registered in other taxes to which they are eligible. 	
2. Filing risk High	
<ul style="list-style-type: none"> Missing tax returns; Late filling of tax returns. 	1. Education <ul style="list-style-type: none"> Develop literature and distribute education materials explaining tax requirements; Conduct education seminars for manufacturing enterprises and individuals on tax requirements; Conduct advisory visits.
3. Payment risk: High	
<ul style="list-style-type: none"> The majority of arrears are associated with high risk small & micro enterprises and low-risk small & micro enterprises. 	
4. Inaccurate and incomplete reporting risk: High	
<ul style="list-style-type: none"> Expensing VAT (total invoice VAT inclusive); Charging withholding tax of 15% on sitting allowance instead of 30%; Expenses without supporting documents; Expenses not related to the business; Benefit in kind not charged PAYE; Differences between staff costs declared in profit and loss account as per RRA returns and staff costs in trial balance; Non declaration of PAYE of 15% for casual labourers; Non declaration of rental income; Expensing fines, interest and penalties; Not withholding 15% on payments made to unregistered suppliers; 	2. Detection <ul style="list-style-type: none"> Carryout tax audits to risky taxpayers; Data analysis to identify non-compliance (underreporting) cases; Engage Rwanda Standards Board (RSB) on measurements used in industrial production; Streamlining the EBM stock monitoring function. 3. Enforcement <ul style="list-style-type: none"> Taxpayers' recruitment on central taxes; Identify, monitor and follow up non-filers and non-payers; Automated SMS to remind of filing and payment obligations; Enforcement of tax arrears.

- Wrong amount of losses carried forward;
- Destructed, damaged and expired goods without confirmation report from competent authorities;
- Declaration of non-deductible expenses;
- Non declaration of gains from disposal (sale) of assets;
- Cancellation of EBM sales without supporting documents;
- Cost of goods sold without supporting documents;
- Not charging VAT reverse charge on services available locally;
- Input VAT claimed not related to the business;
- Taxable sales declared as exempted;
- Charging withholding tax of 15% on net amount instead of gross amount;
- Non application of excise tax on promotional products;
- Non apportionment of input VAT (in case of taxable and exempted sales);
- Wrong application of depreciation rates on assets;
- Understatement of EBM invoice;
- Overstated cost of sales;
- Overstatement of stock;
- Commissions expensed and included in the purchase price (duplication);
- Shareholders equity injected into the company considered as loans but not fulfilling the characteristics of loans;
- Not withholding tax from interest on loan;
- Application of wrong exchange rates on payments made in foreign currencies;
- Underreporting of profits by manipulation of the input/output.

8.2 CUSTOMS (INTERNATIONAL TRADE TAXES)

The compliance actions for Customs services (international trade taxes) will focus on Importers dealt with high-risk commodities, Importers who imported goods from high-risk origin, Traders who benefited EAC duty remission scheme (Exemption), selectivity criteria with highest hit rate and Customs brokers (Clearing Agencies). To be able to map Importers and Customs brokers into risk quadrants the following risk metrics were used:

a) Risk metrics for Importers: All risky areas targeted

FINANCIAL IMPORTANCE METRICS	RISK ASSESSMENT METRICS
CIF – 15%	Percentage of amendment (Declarations) – 25%
Tax paid – 50%	Percentage of uplift (Amount) – 75%
Number of transactions – 5%	
Number of transactions modified – 10%	
Initial amount – 10%	
Amount modified – 10%	

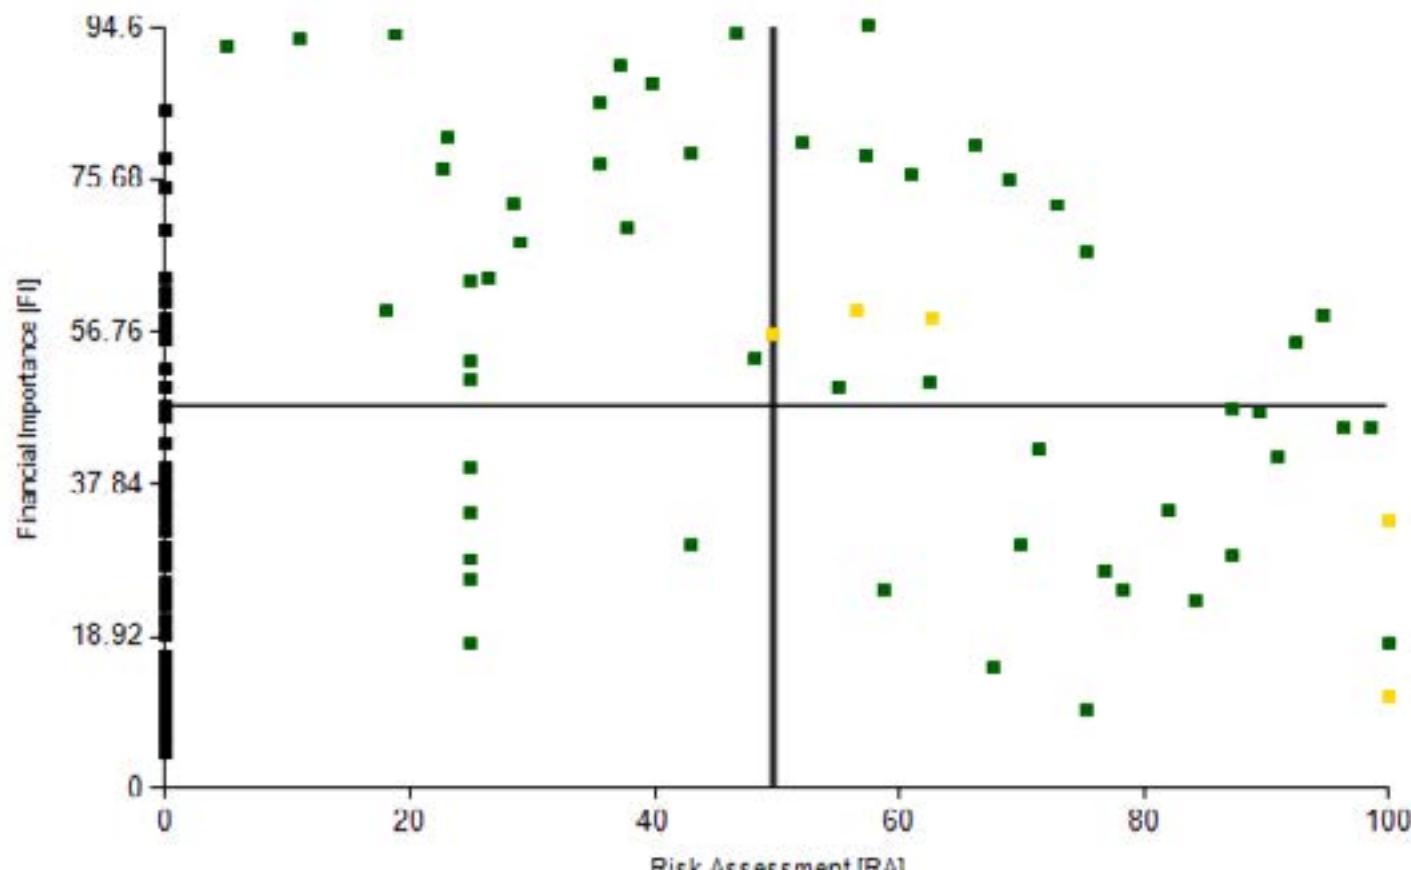

b) Risk metrics for Customs Brokers (Clearing Agencies)

FINANCIAL IMPORTANCE INDICATORS	RISK ASSESSMENT INDICATORS
CIF – 25%	Percentage of amendment (Declarations) – 75%
Number of transactions – 25%	Percentage of uplift (Amount) – 25%
Number of transactions modified – 40%	
Initial amount – 5%	
Amount modified – 5%	

The compliance actions will be categorized into community interaction, media, education seminars, advisory visits and tax audits. This part shows the Risk Differentiation Frameworks (RDFs) and compliance actions for Customs services.

8.2.1 Importers dealt with high-risk commodities

Figure 12: RDF results for importing companies dealt with high-risk commodities

Profiles are highlighted in the colour of the category associated with their most prominent risk metric.

For example, if the most prominent risk metric in a profile is in the VAT category, the profile will be highlighted in the VAT category colour.

The purpose of this approach is to, at a glance, visualize the key issues associated with the selected taxpayers.

8.2.4 Selectivity criteria with highest hit rate (importers on selectivity lists of Yellow Category A and Red Category A)

Figure 17: RDF results for importing companies in selectivity criteria with highest hit rate

Profiles are highlighted in the colour of the category associated with their most prominent risk metric.

For example, if the most prominent risk metric in a profile is in the VAT category, the profile will be highlighted in the VAT category colour.

The purpose of this approach is to, at a glance, visualize the key issues associated with the selected taxpayers.

Compliance Strategy: Importers and Customs Brokers

Key Compliance Risks	Risk Treatments
1. General Risk: High <ul style="list-style-type: none"> • Exceeding quantity declared; • False declaration of origin; • Misclassification of goods; • Non reported goods; • Prohibited – restricted goods; • Under valuation of goods; • Uploading wrong documents to the declaration; • Using incorrect office codes; • Value declared different from attached invoice; • Weight different from the attached documents; • Wrong commercial description; • Wrong CPC; • Pervasive culture of noncompliance among brokers; • Significant culture of noncompliance among traders. 	<p>1. Education</p> <ul style="list-style-type: none"> • Education seminars to Importers and Clearing agents; • Conduct advisory visits to review and advise on taxpayers' operations; • Coordinate with the Private Sector Federation to facilitate compliance awareness; • Consultative and interactive meetings with identified customs stakeholders; • Field visits to local manufacturers; • Conduct sensitization and awareness on the application of the automated advance ruling module. <p>2. Support</p> <ul style="list-style-type: none"> • Advance rulings, making people more aware of the process. <p>3. Simplification or process improvement</p> <ul style="list-style-type: none"> • Increase the number of facilitated companies under Gold card scheme and AEO benefiting blue channel treatment.
2. Classification Risk: High <ul style="list-style-type: none"> • Intentional misclassification on advice of clearing agents; • Significant lack of classification knowledge in the business community 	

3. Valuation Risk: High Pervasive, intentional use of false supporting documents; Incomplete and inaccurate valuation data.	4. Detection Carryout tax audits to high risky importers; Monitor the performance of Customs Agents. 5. Enforcement Writing warning letters to non-compliant clearing agents; Enforcement of tax arrears; Publish lane statistics of clearance time (time release) for all clearing agencies on a quarterly basis.

CONCLUSION

Strategies in the tax compliance improvement plan document intends to enable RRA achieve its objective of taxpayers committing to their tax obligations and enhancing voluntary tax compliance. The ultimate goal is not to find non-compliance but to prevent non-compliance. RRA will continue to place its customers at the forefront and further ensure the provision of quality service which will stimulate voluntary compliance. RRA will continue to streamline its operations, create new and innovative ideas and channel its communication methods to improve the overall tax administration. Change is constant and should be embraced, therefore it is imperative that RRA will continue to plan ahead, think 'outside the box' and adapt to the ever-changing environment. RRA will remain innovative in transforming its core business in a manner that keeps pace with changes in technology, business and other management practices to meet the expectations of Rwandans.

THANK YOU
