

TAX COMPLIANCE IMPROVEMENT PLAN (2021-2022)

JUNE 2021

VISION

To become a **world-class efficient** and **modern revenue** agency, **fully financing** national needs.

MISSION

To **mobilise revenue** for **economic development** through **efficient** and equitable services that **promote business** growth.

HERE OF **YOU**
TO SERVE

FOREWORD BY THE COMMISSIONER GENERAL

**BIZIMANA
RUGANINTWALI Pascal**
Commissioner General

It is our pleasure to introduce the RRA Tax Compliance Improvement Plan for the fiscal year 2021/2022. This Compliance Improvement Plan is fundamental as it outlines at the highest level in line with our strategic direction, the compliance approaches we will use during this fiscal year in our efforts to improve compliance with tax legislation. It describes the major compliance risks to be addressed, Taxpayers they relate to and how the risks will be treated to elevate voluntary compliance in the core compliance areas of registration, filing, payment and accurate reporting.

This Tax Compliance Improvement Plan outlines specific strategies by focusing particular attention on areas which our research and risk analysis model and tools have shown pose a significantly higher risk of non-compliance.

Our tax system is based on the principles of self-assessment and voluntary compliance which relies on taxpayers' honesty in determining their tax obligations, submitting

their tax returns, voluntary payment of due taxes and accurate reporting. We believe that if you are making your fair contribution and doing the right thing, you deserve to know that everyone else is doing so too! As we make it easier for all taxpayers to meet their obligations quickly, easily and cost-efficiently, we must make equally sure that those who don't pay their fair share and don't abide by the rules are brought into the fold. By focusing on these issues we believe we can make a significant impact on increasing the fairness of the tax system.

The ultimate goal is not to find non-compliance but to prevent non-compliance. We would like to help people recognize behaviors that pose a risk to them and take measures to avoid them, thereby encouraging voluntary compliance. By providing our customers visibility into our compliance activities, we hold ourselves accountable and hope to enlist support from the broader community to ensure fair administration of tax collection and the prosperous development of our country.

This is our sixth annual Compliance Improvement Plan. Our previous compliance improvement plans have made a significant contribution towards voluntary compliance. I cordially convey my gratitude to Taxpayers, Tax practitioners and other stakeholders for their cooperation throughout the implementation of the previous Compliance Improvement Plans.

To ensure our compliance program is broad and inclusive, our Compliance Improvement Plan will focus on two main aspects i.e. general compliance interventions and specific compliance interventions. Our general compliance interventions will focus on the four core areas of tax compliance obligations i.e. registration, filling, payment and accurate reporting. Our specific compliance interventions will focus on construction sector, information and communication sector, Importers and Customs brokers.

The areas earmarked for attention in this publication are of course not the only areas we will be working on. We will continue with our usual work in detecting and deterring non-compliance through the use of our risk engines, third party data and other sources of information which help us to identify non-compliance. We will also emphasize on improving our service delivery to the public so that we can meet taxpayers' expectations and provide the service they deserve.

We believe that the most effective way to gain and maintain voluntary compliance is through building a relationship of mutual trust and respect between the tax administration and the taxpayers of Rwanda. To this end, in externally publishing our compliance improvement plan we seek to inform taxpayers, tax practitioners and stakeholders the existing tax compliance challenges and RRA's approach at addressing these challenges. As RRA works towards realizing its vision, let us continue to work together to improve tax compliance in the interests of the nation's growth and development. I hope that you will join RRA in ensuring that our tax system works fairly and that everyone pays their fair share. In this way, the Government of Rwanda can trust to have sufficient revenues enabling it to meet citizens' expectations in terms of public goods and services supply, hence leading to self-reliance.

Sincerely,
BIZIMANA RUGANINTWALI Pascal
Commissioner General

1. INTRODUCTION

The fundamental function of a revenue body is to collect the tax that is due in accordance with the law. Revenue bodies undertake this function in a world where citizens have high expectations of revenue bodies in terms of both efficiency and service. Mobilizing more domestic revenue is the best way for governments to provide basic public goods/services, reduce foreign aid and reduce fiscal deficit. To this end, raising more domestic revenues is a priority for any revenue collection institution. In fulfilling this mandate, RRA's key objectives are aimed at improving compliance and optimizing revenue collection.

Taxpayers on the other hand, have the obligation to report and pay taxes, and thus contribute to the economic growth and development of their Countries. The actions of taxpayers – whether due to ignorance, carelessness, recklessness, or deliberate evasion, as well as weaknesses in the tax administration mean that instances of failure to comply with the tax law are inevitable. Therefore, tax administration should have in place strategies and structures to ensure that non-compliance with tax laws are kept to a minimum. The art of good tax administration is based on the creation of an environment which is strongly facilitating compliance. This

Compliance Improvement Plan outlines how RRA is going to achieve this.

Different studies categorize Taxpayer's compliance in two perspective models (economic Deterrence model and fiscal and social psychology model). Economic Deterrence model is based on the concept that the risk of detection and punishment will improve compliance behavior. Whereas fiscal and social psychology models inductively examine the attitudes and beliefs of taxpayers in order to predict actual behavior.

The FY 2021-2022 tax compliance priorities will be focused on the utilisation of a robust compliance management framework which will be executed through a multi-faceted approach. RRA efforts will focus on improving Taxpayers compliance in identified mostly risky areas and sectors. This is going to be achieved through undertaking various initiatives targeting to influence taxpayers' compliance behavior through community interaction, education seminars, advisory visits, data analytics to identify instances of non compliance, tax audits and strong enforcement measures for intentional non compliance attitude.

BACKGROUND

Since the establishment of Rwanda Revenue Authority, numerous activities have been implemented to enhance Taxpayers' registration, filling of tax returns, payment of due taxes and accurate reporting. The TADAT assessment report of August 2015 identified unsystematic assessment of compliance management interventions across the RRA in the areas of registration, filing, payment and accurate reporting and highlighted that there is a need for RRA to understand the causes of non-compliant behavior of taxpayers and take adequate corrective measures. The international experience suggests that most types of noncompliance are best treated by: i) understanding underlying causes; ii) making groups of taxpayers aware that their noncompliant behavior is known; iii) adopting a cooperative approach to reconciling; and iv) demonstrating the seriousness of the administration through small numbers of high-profile enforcement activities. It is in this context that RRA with IMF technical assistance developed compliance risk analysis model and tool based on best practices from Australia Tax Office.

Since then RRA adopted developing and implementing the annual tax compliance improvement plan. Strategies in the compliance improvement plan document intends to enable RRA achieve its objective of taxpayers committing to their tax obligations and

enhancing voluntary compliance. RRA has so far developed and implemented five (5) annual tax compliance improvement plans (2016-2017, 2017-2018, 2018-2019, 2019-2020 and 2020-2021). The plans have been developed and implemented focusing particular attention on areas and sectors which research and risk analysis model and tools show pose a significantly higher risk of non-compliance.

The TADAT assessment of 2019 pointed out some weak areas including not addressing all compliance risks that RRA has rated as high in the strategic planning process. It is in this context that the tax Compliance Improvement Plan 2021-2022 will focus into two main aspects i.e. general and specific compliance interventions. The general compliance interventions will focus on four areas of tax compliance obligations i.e. registration, filing, payment and accurate reporting, all taxpayer segments and all tax heads. The specific compliance interventions will focus on construction sector, information and communication sector, compliance actions on research findings, Importers and Customs brokers. The strategies in this document will definitely enable RRA to achieve its objective of taxpayers committing to their tax obligations and enhancing voluntary compliance.

3. OBJECTIVES OF THE COMPLIANCE IMPROVEMENT PLAN

The purpose of a taxpayer compliance program is to identify and respond to the most significant risks in the tax system through a range of measures aimed at the underlying causes of the noncompliant behavior. The main objective is to achieve the widest possible impact on voluntary compliance across the taxpayer population. Specifically, the RRA tax compliance improvement plan 2021-2022 intends to;

- Elevate voluntary tax compliance
- Improve Taxpayers' knowledge
- Improve Taxpayers' attitudes and perceptions towards paying taxes
- Improve the community confidence with the tax administration

4. UNDERSTANDING COMPLIANCE

Generally, compliance means conforming to a specification, standard or law that has been clearly defined. It is the practice of obeying a rule and law in accordance with established guidelines, try to fit specific standards set and meet the requirements of prescribed regulations. Compliance in the context of tax administration refers to the extent to which taxpayers and traders, along with intermediaries like practitioners fulfil their tax obligations. Compliance with tax laws in Rwanda typically means registering when required, filing returns on time, reporting complete and accurate information to determine tax liability and paying all amounts owing when due. Non-compliance occurs when any of these obligations are not met for whatever reason.

Tax obligations placed on a taxpayer varies from one tax type to another and from one jurisdiction to the next. However, the four major broad categories of taxpayer obligations remain the same for all taxpayers irrespective of jurisdiction, these are:

- **Registration** - Any person subject to any type of tax administered by RRA has to be registered in RRA and obtain a fiscal number before engaging in any economic activity of taxation relevance.
- **Filing and declaration** – Taxpayers have to file tax returns with RRA in accordance with the tax legislation. All importers and exporters have to declare their imports or exports in accordance with the East African Community Customs Management Act (EACCMA).
- **Complete and accurate reporting** – Each taxpayer is obliged to keep evidence of economic activities (books, records, invoices, etc.) as required in the tax legislation and submit/present the data and or documentation required by RRA accurately and timely in accordance with the tax legislation.
- **Payments** – Taxpayers have to pay taxes and duties at the specified time without RRA notice or request.

If a taxpayer fails to meet any of the above obligations then they may be considered to be non-compliant. The willingness and behavior of a customer to meet tax obligations has a major impact on compliance levels. In order to achieve the optimal level of compliance, it is necessary to pay attention to customer behavior and the methods of influencing behavior. This will assist the tax administration in choosing the most efficient (low costs) and effective (best outcome) way to treat such behaviors. This is better explained in the OECD Compliance pyramid and behavior model shown below:

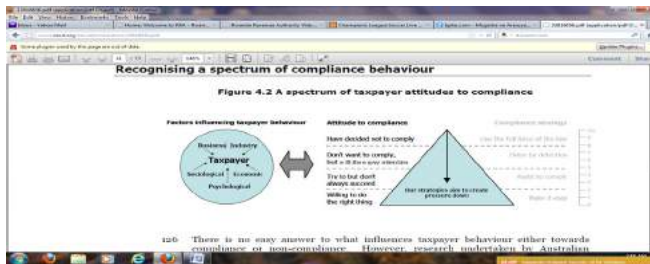

Figure 1: Compliance model

Source: OECD 2004, Compliance Risk Management Guidance Note

The compliance model above provides a structured way to better understand what motivates people to comply, or not comply, and it assists us to tailor our responses and interventions so that we can influence taxpayer behavior in a positive way. It recognizes that taxpayers are not a homogenous group and their circumstances can change over time.

The left side of the model identifies the wide variety of factors that can influence the extent to which a taxpayer chooses or is able to meet their obligations, including business, industry, sociological, economic and psychological factors. This mix of environmental factors is represented by the acronym BISEP: B = business profile, I = industry factors, S = sociological factors, E = economic factors and P = psychological factors.

The right side of the model reflects the different taxpayer attitudes to compliance, ranging from 'willing to do the right thing' to 'have decided not to comply', and the corresponding high level strategies that are most likely to effectively address those attitudes.

5. OUR APPROACH TO DETECT NON COMPLIANT SECTORS AND AREAS

To monitor the compliance levels of taxpayers in order to pin-point areas of high or low compliance, some analysis and researches were conducted and risk differentiation framework (RDF) was used to map taxpayers in the same sector/ area into different categories of risks so that we can devise appropriate strategies in line with our compliance approach to sustain or alter the behavior as required.

Studies:

- Economic sector performance and tax compliance analysis, 2020.
- Taxpayers' Behavior by ICTD, 2020.

Risk Differentiation Framework (RDF):

RRA adopted the Risk Differentiation Framework (RDF) made up of four different quadrants (groups) that contain taxpayers with common behaviors as per risk perspective.

Quadrant 1: Higher Risk Taxpayers

Quadrant 2: Key Taxpayers

Quadrant 3: Medium Risk Taxpayers

Quadrant 4: Lower Risk Taxpayers

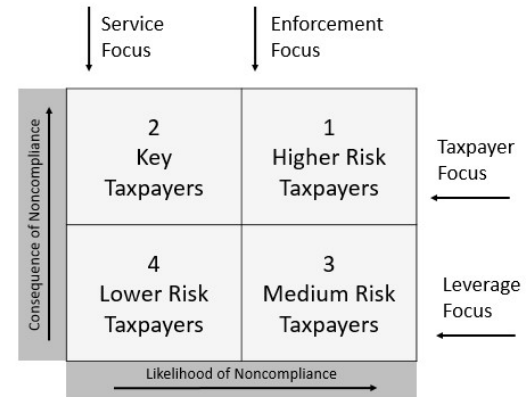

Figure 2: RRA Risk Differentiation Framework

6. PRIORITY AREAS AT A GLANCE

The above RDF is based on the premise that our risk management approach to tax compliance should take account of our perception of both the:

- i) Estimated likelihood of having a tax position that we disagree with, or taxpayer (through error or omission) have misreported tax obligations (as evidenced by behavior, approach to business activities, governance, and compliance with tax laws),
- ii) Consequences of that potential non-compliance (financial impact, relative influence, impact on community confidence).

The Compliance Improvement Plan 2021-2022 is divided into two aspects. On the first aspect the plan will focus on general compliance intervention on the basis of four core areas of tax compliance i.e. registration, filing, payment and accurate reporting, all taxpayer segments and all tax heads. The second aspect will focus on specific compliance interventions by targeting the areas our research and risk analysis models have identified as most non compliant. To this end, our specific compliance interventions will focus on construction sector, information and communication sector, Importers and Customs brokers.

7. COMPLIANCE STRATEGIES

In this compliance improvement plan we will focus on improving compliance in both domestic taxes and customs (international trade taxes). The compliance strategies will be categorized into general compliance interventions and specific compliance interventions.

7.1 GENERAL COMPLIANCE INTERVENTIONS

The TADAT assessment of April 2019 recommended RRA to always include all compliance activities in the annual compliance

improvement plan. It is in this regard that in this fiscal year, the Compliance Improvement plan is including the general compliance interventions which will focus on the four core areas of tax compliance obligations, namely registration, filling, payment and accurate reporting all taxpayer segments and all tax heads. Data for the calendar year 2020 were analyzed to identify the instances of non-compliance and identify most non-compliant sectors in all core areas of tax compliance, all taxpayer segments and all tax heads i.e. VAT, CIT/PIT, PAYE and EXCISE.

Compliance strategy: General compliance intervention

1. Strategy Overview:	All core areas of tax obligations are concern for compliance interventions in all tax types and taxpayer segments. The strategies for improvement will be awareness SMSs on registration eligibility and obligations, follow up to register potential unregistered taxpayers, monitoring non fillers and non payers, education seminars to new registered taxpayers, data analysis to identify instances of non compliance, tax audits, enforcement of tax arrears and enforcement of EBM usage.

7.1.1 REGISTRATION

Any person subject to any type of tax administered by RRA has to be registered in RRA and obtain a fiscal number before engaging in any economic activity of taxation relevance. The registration risk

is that Taxpayers fail to register with RRA when they are supposed to. Treatment strategies to improve registration compliance will involve activities aimed at taxpayers operated outside the tax net in the year 2020 being registered.

General compliance interventions: Registration

NO	OWNER	DUE BY	COMPLIANCE STRATEGIES	TAXPAYER SEGMENT	TAX HEAD	MOST NON COMPLIANT SECTORS
1	CRMM & DTD	30-SEPT-21	Send awareness SMSs on registration eligibility and obligations	Small & Medium	VAT	Wholesale and retail trade; repair of motor vehicles and motorcycles
						Manufacturing
						Other service activities
						Transportation and storage
						Professional, scientific and technical activities
2	DTD	30-JUNE-22	Follow up to register potential unregistered Taxpayers identified		CIT/PIT	Information and communication
						Professional, scientific and technical activities
						Construction
						Other areas (Importers who imported at least 3 times goods with CIF equal or greater than 20M but not registered in CIT/PIT)
						Other areas (Importers who imported at least 6 times goods with CIF between 2M and 20M but not registered in CIT/PIT)
						Other areas (Taxpayers that declared trading license equal or greater than 40,000 in 2018, but not registered in PIT/CIT)
PAYE	Wholesale and retail trade; repair of motor vehicles and motorcycles					
	Construction					
	Professional, scientific and technical activities					

7.1.2 Filing and declaration

Taxpayers have to file tax returns with RRA in accordance with the tax legislation. All importers and exporters have to declare their

imports or exports in accordance with the East African Community Customs Management Act (EACCMA). The compliance risk is that Taxpayers don't file returns or other information required on time.

General compliance interventions: Filing

NO	OWNER	DUE BY	COMPLIANCE STRATEGIES	TAX HEAD	MOST NON COMPLIANT SECTORS	TAXPAYER SEGMENT
1	DTD	Quarterly	Monitoring non fillers	CIT/PIT	Wholesale and retail trade; repair of motor vehicles and motorcycles	Large, Medium and Small
					Transportation and storage	Large and Small
					Financial and insurance activities	Medium and Small

					Other service activities	
2	TPS	30-MAR-22	Education seminars to new registered Taxpayers in all districts	All tax heads	All sectors	Small Taxpayers

7.1.4 Complete and accurate reporting

Each taxpayer is obliged to keep evidence of economic activities (books, records, invoices, etc.) as required in the tax legislation and submit/present the data and or documentation required by RRA accurately and timely in accordance with the tax legislation. The compliance risk is that Taxpayers file false or incorrect returns.

General compliance interventions: Complete and accurate reporting

10	EBM	30-JUNE-22		EBM enforcement activities by category of EBM users (Compliance drivers, Hospitality industry and Construction sector)	
11	EBM	30-JUNE-22		Conduct mystery shopping to detect non-compliance	
12	EBM	30-JUNE-22		EMB communication activities set in the awareness and promotion plan	

Source: The number of audit cases and percentage of arrears recovery from DTD action plan 2021-2022

7.2 SPECIFIC COMPLIANCE INTERVENTIONS

The specific compliance interventions will focus on construction sector, information and communication sector, Importers and Customs brokers. The compliance actions will be categorized into literature, community interaction, media, online education seminars and advisory visits.

DTD Risk metrics

FINANCIAL IMPORTANCE METRICS	RISK ASSESSMENT METRICS
Income – 30%	Effective Tax Rate – 7%
Total Supplies – 35%	Ratio: Purchases to Supplies – 5%
Arrears – 10%	Ratio Payments Liabilities(All) – 5%
Payments (All Accounts) – 15%	Ratio VAT Input Output – 8%
Losses for Year – 5%	Ratio Payments Liabilities VAT – 5%
Imports Value (CIF) – 5%	Ratio refund Not Yet Approved – 5%
	Ratio: Change of expense YOY – 3%
	Ratio Payments Liabilities CIT – 5%
	Net Profit Margin – 7%
	Net Profit Margin YoY – 7%
	Ratio: Current Losses To Carried – 7%
	Ratio: Net Income over Gross Income – 5%

7.2.1 DOMESTIC TAXES

The compliance actions for risky sectors in Domestic taxes will be categorized into literature, community interaction, media, online education seminars and advisory visits. To be able to map taxpayers into risk quadrants we used the following risk metrics:

Figure 3: RDF Results for Construction sector (Large and Medium Enterprises)

Profiles are highlighted in the color of the category associated with their most prominent risk metric.

For example, if the most prominent risk metric in a profile is in the VAT category, the profile will be highlighted in the VAT category color.

The purpose of this approach is to, at a glance, visualize the key issues associated with the selected taxpayers.

Legend	
\Customs	Grey

MEDIA

Compliance Strategy: Construction sector

1. Strategy Overview:		The construction sector represent a significant share of the tax base. It is a high risk sector for all core compliance categories of registration, filing, payment and reporting. The behavior observed suggests a widespread culture of noncompliance. To break the culture, a well-coordinated media campaign will be initiated, online compliance education seminar will be organized, advisory visits/telephone calls/emails and tax audits will be conducted.																																														
2. Segment Profile		3. Key Compliance Risks		4. Risk Treatments																																												
2.1 Amount / type of tax revenue: <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 15%;">Tax Type</th> <th style="width: 20%;">Revenue</th> <th style="width: 10%;">Tot. 7.2.1.2 Information and Communication sector

The Information and Communication sector represents a significant share of the tax base. The sector contributes 0.8% of total CIT/PIT, 0.8% of total VAT and 10.3% of total PAYE (Calendar year 2020). The study on the responsiveness of income tax and value added tax to sectoral economic growth indicates that the actual tax growth of VAT was -38.2% which is low compared to the expected tax growth of -9.1.

Figure 7: RDF Results for Information and Communication sector (Large and Medium Enterprises)

Profiles are highlighted in the color of the category associated with their most prominent risk metric.

For example, if the most prominent risk metric in a profile is in the VAT category, the profile will be highlighted in the VAT category color.

The purpose of this approach is to, at a glance, visualize the key issues associated with the selected taxpayers.

7.2.2 CUSTOMS (INTERNATIONAL TRADE TAXES)

The compliance actions for Customs (international trade taxes) will focus on importers (both companies and individuals) and Customs brokers (Clearing Agencies). To be able to map Importers and Customs brokers into risk quadrants we used the following risk metrics:

a) Risk metrics for Importers: Both Companies and individuals

FINANCIAL IMPORTANCE METRICS	RISK ASSESSMENT METRICS
CIF – 15%	Percentage of amendment (Declarations) – 25%
Tax paid – 50%	Percentage of uplift (Amount) – 75%
Number of transactions – 5%	
Number of transactions modified – 10%	
Initial amount – 10%	
Amount modified – 10%	

b) Risk metrics for Customs Brokers (Clearing Agencies)

FINANCIAL IMPORTANCE INDICATORS	RISK ASSESSMENT INDICATORS
CIF – 25%	Percentage of amendment (Declarations) – 75%
Number of transactions – 25%	Percentage of uplift (Amount) – 25%
Number of transactions modified – 40%	
Initial amount – 5%	
Amount modified – 5%	

The Compliance actions for Customs (international trade taxes) will focus on importers (both companies and individuals) and Customs brokers (Clearing Agencies). The compliance actions will be categorized into community interaction, media, online education seminars, advisory visits and tax audits. This part shows the Risk Differentiation Frameworks (RDFs) and compliance actions for Customs services.

7.2.2.1 Importers

7.2.2.1.1 Importing companies

Figure 10: RDF Results for Importing Companies

Profiles are highlighted in the color of the category associated with their most prominent risk metric.

For example, if the most prominent risk metric in a profile is in the VAT category, the profile will be highlighted in the VAT category color.

The purpose of this approach is to, at a glance, visualize the key issues associated with the selected taxpayers.

Compliance strategy: Importers and Customs Brokers

Community interaction

1. Strategy Overview:		All categories of compliance risk are a concern. A significant culture of non-compliance exists throughout the trading community. Classification, description and valuation are problematic. The plan for improvement will focus first on clearing agents – online education seminars, publishing lane statistics of clearance time (time release) and warning letters to clearing agents appeared in high risk quadrant in two consecutive years. In addition, RRA will conduct advisory visits/telephone calls/emails to review and advice on taxpayer operations.																																														
2. Segment Profile 2.0 Criteria for inclusion: All active traders 2.1 Number / Type of Entries: <table border="1" data-bbox="248 378 405 624"> <thead> <tr> <th>Type</th> <th>#</th> <th>CI/FDB Amount</th> </tr> </thead> <tbody> <tr><td>EX 1</td><td>19,109</td><td>1,099.3b</td></tr> <tr><td>EX 2</td><td>150</td><td>7.4b</td></tr> <tr><td>EX 3</td><td>24,669</td><td>358.2b</td></tr> <tr><td>EX 8</td><td>2</td><td>0.05b</td></tr> <tr><td>EXS 1</td><td>2,323</td><td>0.7b</td></tr> <tr><td>IM 4</td><td>128,282</td><td>2,177.1b</td></tr> <tr><td>IM 5</td><td>685</td><td>724.1b</td></tr> <tr><td>IM 6</td><td>44</td><td>0.3b</td></tr> <tr><td>IM 7</td><td>363</td><td>13.4b</td></tr> <tr><td>IM 8</td><td>15,431</td><td>423.6b</td></tr> <tr><td>IMS 4</td><td>21,601</td><td>4.3b</td></tr> <tr><td>WH 7</td><td>23,176</td><td>1,143.2b</td></tr> <tr><td>TOTAL</td><td>235,835</td><td>5,951.5b</td></tr> </tbody> </table>		Type	#	CI/FDB Amount	EX 1	19,109	1,099.3b	EX 2	150	7.4b	EX 3	24,669	358.2b	EX 8	2	0.05b	EXS 1	2,323	0.7b	IM 4	128,282	2,177.1b	IM 5	685	724.1b	IM 6	44	0.3b	IM 7	363	13.4b	IM 8	15,431	423.6b	IMS 4	21,601	4.3b	WH 7	23,176	1,143.2b	TOTAL	235,835	5,951.5b	3.0 Key Compliance Risks 3.0 General risk High <ul style="list-style-type: none"> Pervasive culture of non-compliance among brokers Significant culture of non-compliance among traders Significant fraudulent activity with new importers Use of unauthorized borders Inadequate feedback captured from examination: Offense codes are optional on Inspection Act form 3.1 Classification Risk: High Intentional misclassification on advice of clearing agents Significant lack of classification knowledge in the business community		4. Risk Treatments 4.1 Measures for facilitating compliance (service) Conduct advisory visits to review and advise on taxpayer operations Publicly recognize Customs brokers for good compliance on an annual basis Publish lane statistics of clearance time (time release) for all clearing agencies on quarterly basis Coordinate with the Private Sector Federation to facilitate compliance awareness Online and radio education seminars to Importers and Clearing agents

Focus specifically on;</p> <ul style="list-style-type: none"> • Undervaluation or Overvaluation of goods • Tariff misclassification of goods • Miss description of goods or wrong commercial description of goods • False declaration of origin • False supporting documents • Ten most risky commodities; <ul style="list-style-type: none"> - Petroleum products/ Lubricants (HS Code: 2710) - Hand bags (HS Code:4202) - Cables (HS Code: 8714) - Vehicle's spare parts (HS Code: 8708) - Padlocks and locks (HS Code: 8301) - Liquors and Wines (HS Codes 2204; 2205; 2206 for Wine, 2208 for liquors) - Men's or boys' suits (HS Code: 6103) - Shoes (HS Codes: 6402; 6403 & 6405) - Woven Fabrics (HS Code: 5514) - Tiles (HS Code: 6901)

8. CONCLUSION

Revenue authorities have a central role and vested interest in ensuring that taxpayers and other parties meet their obligations under the tax laws. With an ever changing environment, it has therefore become more critical for revenue bodies to allocate available resources in a targeted and effective manner. The RRA Tax Compliance Improvement Plan 2021-2022 is critical to RRA's mission. It's ultimate goal is not to find non-compliance but to prevent non-compliance. RRA will continue to place its customers at the forefront and further ensure the provision of quality service which will stimulate voluntary compliance.

RRA will continue to streamline its operations, create new and innovative ideas and channel its communication methods to improve the overall tax administration. Change is constant and should be embraced, therefore it is imperative that RRA will continue to plan ahead, think 'outside the box' and adapt to the ever-changing environment.
